

SUNSEEKERS

Performance backed by Quality...

SUNGLIDER

Sunseeker 21 Sports

The 21 Sports is a high performance offshore boat built to the highest standards. This boat gives as much room as many 23ft. models, but still you can trail it to your favourite holiday resort. It can be used for Ski-ing and is very roomy for storing aqua-diving equipment, fishing, picnicking or just lazing around in the summer sun on the convertible back seat. Put the camper up and you can use the boat for those night stops in your favourite cove.

Sunseeker 23 Sports

The 23 Sports has a smooth riding offshore hull, which gives as much comfort when cruising as many larger boats. It has a large open cockpit to take 6 to 7 persons in comfort for that sunny day out at sea. As well as the large cockpit, there is a spacious cabin with sleeping accommodation for 2 to 3 people. The aft seat converts to a large sunbathing area or an extra double berth with the camper up for the overnight stop. The 23 Sports is reliable, roomy, yet elegant.

**the boat for
the whole
family to
enjoy...**

Sunseeker 23 Daycab

The 23 DC. is a superbly designed day cruiser having the identical hull in design as the 23 Sport and incorporating the same superb seakeeping qualities. The large open cockpit affords lots of seating and sunbathing areas. The difference in this model is that you have a cabin with 5' 8" headroom, separate toilet, full galley, table with seating for 4 in comfort which also folds to form a large double berth. There is also a couchette under the aft deck to sleep two. The teak blends with the suedette and luxury upholstered seats, giving the comfort and room of traditional cruisers of larger size. Ideal for the weekend or that summer holiday away with the family or friends.

Looking aft to couchette.

Where **SUNSEEKER** boats are made...

The latest range of SUNSEEKERS is the combined effort of eighteen years of development. Using the same design and development team, SUNSEEKERS ambition has been to design and build the best boats you can buy. The superb sea qualities of our latest range have evolved through hours of testing and continuous improvement over many years of production experience. This experience has enabled us to use modern techniques of fibreglass construction yet retain the teakwork and luxurious upholstery of traditional type boats.

Only the highest quality and standards of materials are used. We believe that the only way to build fibreglass offshore boats is by the one-piece hand lay-up method, using layer upon layer of fibreglass matting with woven roving, with overlaps at all joints and keel, and with moulded-in balsa and marine plywood for extreme strength and rigidity. There are cheaper ways of building. Just compare the weights of similar boats!

Our boatyard is situated on the edge of Poole Harbour with its own deep water quay for ease of testing, with our modern factory adjoining.

For your after-sales service, we have a network of the best dealers throughout Europe.

Sunseeker Registered Trade Mark.

Volvo Penta sterndrives are fitted as standard by Sunseekers because of their proven dependability and world-wide service network.

20 Sports *(see front cover)*

This model has proved to be a best seller. Its profile and performance is unquestioned. The spacious cockpit incorporates an adjustable pilot and helm seat and a large aft seat which unfolds into a sunbathing area. The teak louvered door opens into a two berth cabin, fully upholstered and carpeted. She is a thoroughbred built for the powerboat connoisseur.

Our policy is one of continuous improvement and the right to change specifications and price without notice is reserved.
